### **IAA elects 104 new Members**

The International Academy of Astronautics (IAA), has elected 104 new members, many of whom will be inducted on October 11<sup>th</sup>, 2009 during the Academy Day Honor Night in Daejeon, South Korea.

The IAA is an honorary society with an action agenda. The Academy has a strong scientific program with this year about 16 standalone conferences around the world. The International Academy of Astronautics (IAA) is an independent organization of distinguished individuals elected by their peers for their outstanding contributions to astronautics and the exploration of space. The IAA has both its independent studies (38 in preparation and 4 published since January) and conferences and collaborates with others partner societies. Although the IAA has many connections to other similar organizations, it is distinctive as the only international academy of elected members in broad area of astronautics and space.

IAA membership consists of individuals who have distinguished themselves in one of the fields of astronautics or one of the branches of science of fundamental importance for the exploration of space. Full members are elected for life, while corresponding members are eligible for full membership after two years, but retire after five years.

The Academy was founded by the leaders among the early space pioneers. Continuing that distinguished tradition, current members include the leaders and the key managers in all the space agencies and many space industries, leading space engineers and scientists, prominent space lawyers and judges, and outstanding individuals at the interface of space and society. The new members in alphabetical order are as follows:
